JUNE 17, 2022 ADVERTISING SUPPLEMENT TO THE BALTIMORE BUSINESS JOURNAL

CONNECT WITH CAMI TO PROTECT YOUR BUSINESS

Chris Sachse

CEO & Co-Founder of Think|Stack
Chairperson, Cybersecurity Association
of Maryland, Inc. (CAMI)

Starting in March 2020, we witnessed the rapid transition to remote work and the digitization of essential services. More than two years later, companies are still not adequately protected; a recent study by Tenable found that 74% of organizations attribute recent cyberattacks affecting their businesses to vulnerabilities in remote work technologies. We've learned that no business is too small to experience a cyberattack. Most small businesses don't have the financial resources to stay open; an estimated 60% of small businesses close within six months of a cyberattack. Additionally, business leaders are not ready for the emotional rollercoaster of an incident.

Our Cybersecurity Association of Maryland, Inc. (CAMI) companies exists so that you don't have to chart your security journey alone.

CAMI is here to help your business get straightforward answers to protect your business: what actions can you implement now? And difficult questions: what plans do you need to have in place in the event of a cyber attack? What sort of cybersecurity provider is the best fit for your business needs?

This Guide is one of many ways CAMI exists to help you identify and connect with the right cybersecurity companies.

We are the region's nationally unique resource for a cyber-safe community—consider us your local catalyst for effective cybersecurity solutions. Visit our website at MDcyber.com and click "Find a Cybersecurity Provider" or reach out to us directly (info@MDcyber.com or 443-853-1970) to be put in touch with the resources, referrals, and connections to keep your business thriving.

You can't afford to let the overwhelming questions surrounding cybersecurity preparedness keep your business from protecting your data and operations. Reach out to us today to speak with our cyber companies who are ready and willing to Connect to Protect your business.

Chris Sachse

LET US HELP YOU PREPARE FOR CMMC

WE HAVE YOU COVERED ON EVERY CMMC ANGLE

Remain competitive as a government contractor! As an RPO, candidate C3PAO, LTP, and LPP, Edwards is your trusted advisor for everything CMMC!

TRAINING & EDUCATION

Our curriculum sets the bar, bringing you CMMC-AB approved courses and training materials to achieve business objectives and increase your CMMC resume.

CONSULTING & ASSESSMENTS

Our cybersecurity team are compliance experts! We offer CMMC Preparation Assessments, with varying levels of consulting support – setting you up for CMMC success!

LETTER FROM

GOVERNOR LARRY HOGAN

Dear Friends:

In recent years, news headlines from across the globe have shown us again and again why cybersecurity is vital to the security of our nation and the safety of our people. In addition, we have repeatedly read about damaging and disruptive ransomware attacks, data breaches, and cyber-attacks on infrastructure such as oil pipelines. With cyber threats growing across the nation and the globe, we are deeply proud that Maryland is a world leader in cybersecurity innovation.

Our state's unrivaled cyber assets include the federal agencies and military installations that leverage cyber to protect our national security, as well as a thriving and expanding community of private-sector companies, including established industry giants and emerging startups. Maryland is also home to an elite cyber workforce, fueled by the world-class colleges and universities across our state.

This year, Maryland hosted the Global Cyber Innovation Summit in Baltimore and the Annapolis Cybersecurity Summit at the Maryland State House; and the state continues to support this critical industry through investment incentives and our Buy Maryland Cyber Tax Credit.

In Maryland, we are on the front lines of both cyber defense and the development of new cyber technologies and services. This resource guide, provided by the Cybersecurity Association of Maryland, contains information on the wide array of talented service providers you can find in our state.

Sincerely,

A handwritten signature in black ink that reads "Larry Hogan". The signature is written in a cursive, flowing style.

TABLE OF CONTENTS

CHAPTER ONE.....6

Products & Services A list of companies in Maryland providing cybersecurity products and services for businesses locally, nationally and globally.

CHAPTER TWO.....20

Support Services A list of companies in Maryland providing services to support Maryland's cybersecurity industry.

CHAPTER THREE.....26

Workforce & Education A list of Maryland workforce and education resources.

THE CYBER HUB OF THE EAST COAST IS RISING

In between Baltimore and Washington, DC a third city is growing boldly. Downtown Columbia is a vital center of Maryland's tech evolution, home to industry leaders including Tenable and Edwards Performance Solutions, as well as many ambitious start-ups like Attila Security. It's here where companies gain unparalleled access to top talent, quality of life, and opportunities for growth. It's here where innovation never rests.

"The Merriweather District presents the future of Maryland's tech evolution. We'll continue to lead here at home and on a global scale."

LARRY HOGAN
GOVERNOR OF MARYLAND

"We want to be the pioneers of this new center of culture and commerce. This is the cyber hub of the East and has the potential to become the Silicon Valley of the East."

JILL SHAPIRO
SENIOR DIRECTOR OF GOVERNMENT AFFAIRS AT TENABLE
