

# Mike Aiello

Mike Aiello is a Cybersecurity Executive at Google where he is the Director of Product Management for Google Cloud Platform Security. His risk management, data protection, and privacy products help secure millions of businesses and billions of people every day. In 2017 and 2018, these products unblocked more than one billion dollars of revenue for Google Cloud. Before joining Google, he served as Chief Information Security Officer at Goldman Sachs, where he helped secure Marcus, the company's digital retail bank and established the company's Consumer Trust and Technology Risk Committee.

Mike has spent the last 20 years as a technology innovator and entrepreneur. He has served as an advisor or board member to several cybersecurity companies employing hundreds of professionals. Previously, Mike was the founder and CEO of DIFRwear, a leading manufacturer of radio-frequency identification (RFID) blocking wallets, passport cases, and badge sleeves. The company sold more than two million units to consumers around the world and was featured in The New York Times, The Wall Street Journal, Wired, and others. Mike also founded LifeEnsured, a company which allowed customers to privately manage their online identities after death, which was acquired in 2012 by DSwiss.

Mike has spoken for a variety of audiences from large cyber events like the Gartner Information Security & Risk Management Conference to policy discussions at the Council on Foreign Relations. He regularly works with CEOs, CIOs, and CISOs advising on technology and security risk management. Mike serves on the U.S. Leaders Council for Cordaid, an international relief organization.

Mike has an MBA from the University of Oxford and a Masters in Computer Science focused on Information Assurance from New York University's Tandon School of Engineering and has authored several patents related to cybersecurity and privacy.
